DS&T/ISO

CT: DS&T Wang Network Policy Decisions

25X1

On September 8, 1988, a special Board of Directors meeting took place to establish policy related to the DS&T ADP activities. The following summarizes the actions approved by the Board

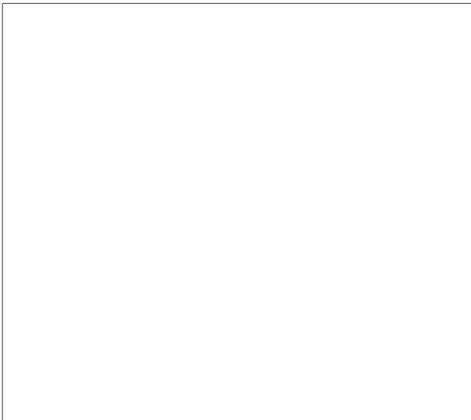

- a. Recommendations of ISPG Policy Subcommittee were accepted as presented. (See Appendix A.)
- b. DS&T Office Directors were requested to forward to the ADDS&T a listing of who (by organization) will have connectivity to the S&T Network and a conceptual diagram of their Office Wang configuration.
- c. OSO was requested to support a vulnerability assessment of connecting AIM to the DS&T Network. The assessment must be completed and briefed to the Board prior to operational use.
- d. OD&E was requested to continue developing a contractor/COTR testbed network. Recommendations of the ORD advisory team are to be integrated into the [Redacted] design. Until an approved multi-level network is available, OD&E may choose to connect most of their COTRS onto this electrically separate network. ODE senior and administrative personnel must maintain separate connectivity to the existing DS&T network.
- e. Impact of moving the NCC to DS&T (recommendation 1 in Appendix A) is to be prepared for ADDS&T [Redacted] action with OD&E coordination.)
